**Sector:** Service > Bioscientific Information Management

**Profile:** In Greek mythology Argos (or Argus), also called Panoptes (the all-seeing), was a many-eyed giant whose eyes were never all closed at once. Thanks to this ample equipment Argos was an excellent observer.  
According to this ancient 'hero' we take a closer look at the developments of modern biotechnology worldwide.

ArgosBiotech is a consulting company focusing on "bioscientific information management (BIM)", i.e. search, processing, evaluation and presentation of bioscientific information.

**Services:**

- bioscientific information retrieval
- market research
- competition analysis
- internet marketing

**Interests:** We are interested in cooperations in the following areas:

- Internet Services
- Internet Marketing
