Sector: Life Sciences > Services > Contract Research Organization

Profile: GenScript is a leading biology CRO focusing exclusively on early drug discovery and development services. Built on our assembly-line mode, one-stop solution, continuous improvement, and stringent IP protection, GenScript provides a comprehensive portfolio of services that include Bio-Reagent, Bio-Assay, Lead Optimization, and Antibody Drug Development which can be effectively integrated into your value chain and your operations. We strive with competence and confidence to meet your demand for developing pre-clinical drug candidates time-efficiently and cost-effectively. With track performance record, GenScript is your ideal and reliable innovation partner in drug discovery.

Services: Gene synthesis, peptide synthesis, protein expression, antibody production, stable cell line development, compound screening, assay development, antibody sequencing, epitope mapping, antibody drug development
