**Sector:** biotech services > synthesis services > peptides / antibodies  
biotech services > analytical services > natural compounds

**Profile:** PANATecs offers bioanalytical products and services to proteomic research and immunology. The core competences are peptide synthesis, antibody production and mass spectrometry services.

**Services:** Peptides, mono- and polyclonal antibodies, mass spectrometry, labeled markers, identification of natural compounds from crude extracts (herbal and animal)

**Interests:** PANATecs is looking for interesting cooperations with pharmaceutical companies, other BioTec companies and companies with a complementary research or production focus.
